

ADVANCED BEAUTY

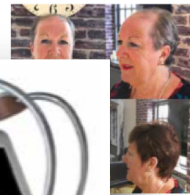

Sculpt & lift

Based on the principle of Compressive MicroBrazion the FDA registered endoSPHERES is entirely non-invasive and works in a 'biological' manner. The handpiece contains a cylinder that rotates on its own axis and contains 55 anti-allergic spheres, working on the body's natural mechanisms to break down, remove and re-shape fat and adipose tissue, whilst at the same time stimulating elastin and collagen production for a fully toned, sculpted, and lifted effect. Visit endospheres.co.uk to find out more.

The three 'R's

SUJVE® allows you to create a bespoke treatment regime for every patient, based on the condition of their skin and its signs of ageing. Using variations of three technologies - Resurface, Rebright, and Remodel - you can ensure your patient has the ongoing regime best suited to their individual requirements. For further details visit lynton.co.uk or call 01477 538 977

Pain-free gain!

In just 20 minutes the first wave of cell stimulation carried out with the endermologie® DETOX treatment drains toxins and 're-oxygenates' the skin. This unique pain-free process uses the LPG® patented treatment head to apply a stimulating massage to the skin on the face and neck. Discover more at endermologie.com

Swept away...

SkinBreeze's Blemish Fix features salicylic acid, a beta hydroxy acid that gently removes surface skin cells, preventing oil from becoming trapped in the pores. The formula also incorporates 'swissess' extract for its powerful soothing properties, and hyaluronic acid which moisturises and provides a protective moisture barrier. The SkinBreeze skincare range has been specifically developed to enhance SkinBreeze treatment results and to provide clients with effective skincare products to use at home.
