# LPG® endermologie®:

## Leading the way to medical aesthetic and anti-ageing techniques

93% of women are looking for natural solutions for their beauty\*.

For 30 years, LPG® has been developing, manufacturing, and marketing advanced, patented endermologie® technology worldwide for the medical, paramedical, aesthetic and sports markets.

The effectiveness of the advanced treatments delivered by the French company has been supported not only by the 80,000 referral centers worldwide, but also by 145 scientific studies, 32 of which published by Medline.

### FIGHT FOR NATURAL BEAUTY BY LPG®

Over the last few years, the beauty market has headed towards quick offers, with immediate results. Customers are seeking efficient solutions and visible results in no time.

Simultaneously, women are paying particular attention to the harmful effects that beauty treatments can have on their bodies. The world of aesthetics is today therefore facing a crucial dilemma: offering aggressive, invasive and quick fix treatments with no long-term guarantee, or offering solutions that take into account the body's health?

With the launch of the 10th generation of the Cellu M6®, LPG® more than ever claims its committed brand values. A strong brand, proud of its positioning that uncompromisingly fights for natural beauty.

### NEW CELLU M6® ALLIANCE PATENT

The technological innovation presented with the new range of Cellu M6® is a pure revolution. Breaking away from the combination of two independent

“Thanks to a range of specific treatment heads and to numerous possible settings, it enables early and gentle tissue mobilisation for antalgic effect and quick results.”

motorized rolls, after years of research, it now associates motorised roll and flap, two patents which have made the success of LPG®.

- It's a synergy of patented technologies for new automated tissue mobilisation.
- Targeted elimination of localised fat
  - Natural synthesis of collagen, elastin (+46%\*\*\*) and hyaluronic acid (+80%\*\*\*)
  - Firmed skin (+71%\*\*\*), orange peel aspect is smoothed (+67%\*\*\*)

This new treatment stimulates, in a single setting, lipolysis and endogenous collagen, elastin and hyaluronic acid production, for a complete action on the figure with simultaneous slimming and anti-aging treatments.

### NEW SKIN ALLIANCE IDENTITY SENSOR

Stomach, saddlebags, cellulite or sagging skin... you no longer need to choose between slimming and anti-ageing. A highly customised complete and pleasant endermologie® treatment is defined depending on:

- Skin type
- Critical areas
- Desired treatment duration (from 10 to 40 minutes)

Cellu M6® offers full made-to-measure treatments, for visible results as of the 3rd session.

### IMPROVE MEDICAL AESTHETICS EXPERIENCE

More than just a beauty treatment, the draining and anti-fibrosis properties of LPG® techniques allow to treat connective tissue transformations (burns, scars, fibrosis...), circulatory disorders (venous and lymphatic) and muscular pathologies (lesions, contractures...). Thanks to a range of specific treatment heads and to numerous possible settings, it

enables early and gentle tissue mobilisation for antalgic effect and quick results.

Based on cellular stimulation, the new Cellu M6® Alliance technology allows to mobilise healthy and damaged tissues beyond the capabilities of the human hand. Whether it be for aesthetics (endermologie®), or therapeutic (endermothérapie®) use, the LPG® patented treatment heads deliver intense yet always pleasant stimulation on the skin surface to reactivate natural physiological processes in-depth:

- Stimulation of natural lipolysis
- Fluid drainage
- Vascularisation acceleration
- Edema and fibrosis improvement
- Muscular preparation and recovery

Over the last decades, LPG® techniques have become a standard of care for many aesthetic surgeons, fat freezing clinics, burn centers and liposuction clinics worldwide.
